

**The TP-Series –
the economical line for the Lab**

The TP series sets new standards in the class of economical laboratory balances.

The performance of the TP-line from Denver Instrument featuring the easy operation, fast readouts, precision and reliability makes this balance the ideal instrument for laboratory, research and educational environments.

Best price: The TP-line is the best solution for tight budgets with its very attractive prices.

New technology: Quick, exact and fast readouts are guaranteed with the new weighing technology incorporated in the TP-line.

Easy operation: The clear display and the ergonomic key pad with huge, clear function keys offers easy handling at any time. Weighing operation was never easier.

Application software: The TP-line comes with a number of useful application programs helping to simplify your weighing tasks, as counting, %-weighing, formulation, average weighing, weighing in 19 different weigh units

Robust: The well-engineered construction is designed for a long lifetime. All mg-balances are equipped with a small analytical glass chamber to

ensure a better protection against environmental influences. The monolithic weighing system is well overload protected and maintenance-free. 2 Years warranty.

ISO: Production according ISO-standards ISO 9001 : 2000 and ISO 14001.

GLP/GMP: The GLP/GMP-protocol can be obtained with an optional printer. Easy connection via the standard RS232-Interface. No extra purchase cost if you need to print

Long Product life: The TP balances are built sturdily to withstand the rigors of research, industrial and educational environments. The rugged construction, protected key pad and superb weighing technology ensures years of reliable operation and working.
